

Introducing Our New Retail POS

The New Paradise POS is more than just a retail POS system. It is a complete retail management system that empowers your business to increase revenue, control costs, improve productivity and drive profitability. Customizable by design, our iPad retail point of sale systems enables you to optimize operational efficiency by defining how the POS works. The Paradise POS also collects and analyzes data that helps you make smarter, more informed business decisions that impact your bottom line.

Comprehensive Tools to Improve Efficiency

- **Designed for iOS:** Our retail POS software is built specifically for use with Apple devices including iPads. Run reports and access info on your iPhone.
- **Payment processing:** Securely and reliably accept all types of payments including EMV and contactless.
- **Offline mode:** Be internet independent. Don't let your business come to a stop just because the internet is down.
- **Barcode and scale integration:** Easily scan, weigh and label product to streamline checkout and control inventory. Use your iPhone or Droid device as a scanner.
- **Inventory management:** Easily communicate inventory counts using a barcode scanner to your POS system, and seamlessly track inventory movement including FIFO and LIFO.
- **Labor scheduling and payroll:** Set schedules to optimize employee labor, control labor costs and streamline the payroll process.
- **Loss prevention and security:** Reduce or eliminate shrinkage, stock outs, and inventory discrepancies.
- **ID scanning and age verification:** Use barcode scanning to easily verify age and eliminate the risk of fines and penalties for selling tobacco or alcohol to underage consumers.
- **Sales tax and commission tracking:** Reward employee performance by offering sales commissions and easily track sales tax including multiple tax rates.
- **Gift cards and loyalty programs:** Offer customized gift cards and incentivize repeat business with loyalty programs.
- **Rental module:** Handle rentals sales, customize set rental time frames and manage deposits while streamlining the rental checkout and return process.
- **Business reporting:** Pull reports that include detailed insight into business performance.
